Kubota RA2071T Evo

Kubota RA2071T Evo side delivery rake, featuring enhanced features.

Picture: Kubota RA2071T Evo in action

Kubota is excited to introduce the RA2071T Evo rake, which includes various upgrades to enhance functionality, durability, and the overall user experience. As an important product in Kubota's Compact Line series, the RA2071T Evo side delivery rake is designed for flexibility and efficiency in raking operations.

The machine impresses with its incredible flexibility and compact transport dimensions. It is possible to rake a large swath with the machine or to make two small swaths with the machine. The machine is ideal for small, uneven, and hilly fields, thanks to its clever design and TerraLink ground contour-following system.

The makeover introduces several cutting-edge features designed to address the continually evolving needs of modern agriculture. Key updates include:

- **The drawbar adjustment via a crank** has been redesigned for more effortless operation. Operators can now adjust from the top, using a crank. This ergonomic enhancement boosts convenience and efficiency.
- **The Cross Bar** has been redesigned. This enhancement ensures smoother operation and increased longevity.

- **New cover** to incorporate this model into the Kubota family look and to avoid crop accumulation on top of the machine.
- **The well-proven TerraLink System** continues to provide excellent ground contouring and reliable performance.
- **Tandem wheels** as standard, providing stability, ground contour following and smooth operation in changing field conditions.

About Kubota

Kubota has been a leading manufacturer of agricultural equipment, construction equipment, lawn mowers and Industrial Engines since 1890. With its global Headquarters in Osaka Japan, offices in more than 120 countries, and more than 50,000 employees in North America, Europe and Asia, Kubota had a turnover of \$20.4 billion in 2022. Although machinery equipment is its main products line, Kubota also produces a wide range of products such as city water purification systems, irrigation systems, piping systems, roof and home construction, and large underground valves.

Our Mission

Our Brand Statement, "For Earth, For Life," speaks to our commitment to the conservation of the environment while aiding the production of food and water supplies, which are vital to meet the needs of our society, as the world's population continues to grow. This mission is accomplished every time a Kubota tractor harvests the land to produce food or when our construction equipment excavates to transport water or provide shelter.
