Farmtrac 6075E makes European debut at EIMA 2026

From livestock farming to fieldwork, the demands placed on a tractor can change several times throughout the day. The new Farmtrac 6075E, making its European debut at EIMA International 2026, has been developed around these everyday requirements, offering a straightforward, value-focused approach to agricultural work.

Whether handling materials, maintaining grassland or working with implements, the Farmtrac 6075E is designed for the range of tasks found on livestock and mixed farming operations, where ease of use and functionality remain key considerations.

At the heart of the new model is a 74 hp Stage V engine, paired with a synchronised transmission and familiar mechanical controls. A 3,000 kg rear lift capacity and suitability for front-loader applications allow the tractor to handle a wide selection of agricultural tasks.

Inside the cab, the focus remains on the operator, with a flat floor, conveniently positioned controls and good all-round visibility. Heating and air conditioning are also included, providing a comfortable working environment throughout the year.

The Farmtrac 6075E brings a distinct proposition to the European market, combining established mechanical technology with an emphasis on straightforward operation and value. As part of the wider Kubota Group portfolio, Farmtrac provides an additional offering for customers whose priorities are centred on functionality and day-to-day agricultural requirements.

Customers will also benefit from the support of Kubota's established European dealer network, with access to professional servicing and aftersales support.

Visitors to EIMA International 2026 will be able to discover the Farmtrac 6075E on the Kubota stand, alongside the company's wider agricultural machinery portfolio.

About Kubota

Since 1890, Kubota has been a leading manufacturer of agricultural equipment, construction machinery, lawnmowers and industrial engines since 1890. With its global headquarters in Osaka, Japan, branches in more than 120 countries and more than 52,000 employees across North America, Europe and Asia. Although machinery is the main product line, Kubota also manufactures a wide range of products, such as municipal water treatment systems, irrigation systems, pipework systems, various materials for roofing and house building, as well as large gate valves and valves

Our Mission

Our brand statement, 'For Earth, For Life', embodies our commitment to protecting the environment and at the same time supports the production of food and drinking water supplies, which are essential for meeting the needs of our society as the world's population continues to grow. We fulfil this mission with our Kubota tractors and agricultural machinery used in harvesting to, or when our construction machinery digs to lay drinking water pipes, thereby reliable protection. Further information about Kubota can be found at www.kubota-eu.com or www.kubota.com.
