PRESS RELEASE
10.11.2026

Kubota strengthens narrow tractor offering with new Farmtrac 6075EN

Kubota is set to strengthen its European agricultural machinery portfolio with the debut of the new Farmtrac 6075EN at EIMA International 2026, expanding its utility tractor offering for specialist growers across Europe

Not every agricultural operation has room for a conventional tractor. The Farmtrac 6075EN addresses this challenge, bringing the performance and practicality growers need into a compact, value focused package suited to vineyards, orchards and specialist horticultural applications.

With an overall width of just 1,480 mm and a turning radius of 3.7 metres, the new model is well suited to working in restricted spaces, offering growers a practical solution for a wide range of applications.

The introduction marks a further step in Kubota's strategy to broaden its tractor offering, providing customers with greater choice across specialist agricultural applications. Positioned as a value focused utility tractor, the Farmtrac 6075EN combines straightforward operation with dependable performance and functionality.

Powered by a 74 hp Stage V engine, the Farmtrac 6075EN is designed to handle tasks including cultivation, spraying, harvesting and transport. A fully enclosed, climate-controlled cab provides operator comfort and visibility throughout demanding working days.

Supported by Kubota's established European dealer network, the Farmtrac 6075EN offers customers the added reassurance of professional service and aftersales support, particularly during critical working periods.

Visitors to EIMA International 2026 will be able to see the Farmtrac 6075EN on the Kubota stand and discover the latest addition to the company's specialist tractor range.

About Kubota

For Earth, For Life

Since 1890, Kubota has been a leading manufacturer of agricultural equipment, construction machinery, lawnmowers and industrial engines since 1890. With its global headquarters in Osaka, Japan, branches in more than 120 countries and more than 52,000 employees across North America, Europe and Asia. Although machinery is the main product line, Kubota also manufactures a wide range of products, such as municipal water treatment systems, irrigation systems, pipework systems, various materials for roofing and house building, as well as large gate valves and valves

Our Mission

Our brand statement, 'For Earth, For Life', embodies our commitment to protecting the environment and at the same time supports the production of food and drinking water supplies, which are essential for meeting the needs of our society as the world's population continues to grow. We fulfil this mission with our Kubota tractors and agricultural machinery used in harvesting to, or when our construction machinery digs to lay drinking water pipes, thereby reliable protection.
