Farmtrac 6050E: A practical choice for every task

From dairy farms and equestrian centres to parks and smallholdings, the need for a capable working tractor extends well beyond traditional agricultural operations. The new Farmtrac 6050E has been developed with these customers in mind, offering a value-focused utility tractor built around simplicity and everyday functionality.

For many operators, the priority is having a tractor that is easy to use and ready for the jobs at hand. Whether feeding livestock, maintaining paddocks, preparing soil or moving materials, the Farmtrac 6050E provides a straightforward solution for customers working across a range of environments.

Powered by a 49 hp Stage V engine, the four-wheel-drive Farmtrac 6050E features a mechanical transmission with eight forward and eight reverse gears, alongside a 1,500 kg rear lift capacity. These features provide the capability for routine agricultural and grounds maintenance work without unnecessary complexity.

The open operator platform has been designed with accessibility in mind. A flat operator area provides practical access to the driving position, while straightforward controls support day-to-day operation.

The 6050E is aimed at customers looking for an accessible, versatile tractor capable of handling a wide range of routine tasks. Its combination of compact dimensions, four-wheel-drive capability and practical specification makes it suitable for smaller agricultural businesses, equestrian facilities, estates and grounds maintenance operations.

With its European debut at EIMA International 2026, the Farmtrac 6050E broadens the choice available to customers seeking a practical utility tractor with a focus on value, functionality and ease of use.

For Earth, For Life

About Kubota

Since 1890, Kubota has been a leading manufacturer of agricultural equipment, construction machinery, lawnmowers and industrial engines since 1890. With its global headquarters in Osaka, Japan, branches in more than 120 countries and more than 52,000 employees across North America, Europe and Asia. Although machinery is the main product line, Kubota also manufactures a wide range of products, such as municipal water treatment systems, irrigation systems, pipework systems, various materials for roofing and house building, as well as large gate valves and valves

Our Mission

Our brand statement, 'For Earth, For Life', embodies our commitment to protecting the environment and at the same time supports the production of food and drinking water supplies, which are essential for meeting the needs of our society as the world's population continues to grow. We fulfil this mission with our Kubota tractors and agricultural machinery used in harvesting to, or when our construction machinery digs to lay drinking water pipes, thereby reliable protection. Further information about Kubota can be found at www.kubota-eu.com or www.kubota.com.
